

COVID-19

Novel Coronavirus

HELP STOP THE SPREAD OF COVID-19

Wash your hands with soap and water often, for at least 20 seconds.

If soap and water aren't available, use an alcohol-based hand sanitizer.

Also avoid touching your eyes, nose, and mouth with unwashed hands.

It's important to turn to credible sources when you are looking for COVID-19 guidance and information. The Brant County Health Unit website is updated regularly as new information becomes available.
